SUMMARY

Frontend Developer with 2+ years of experience, specializing in both Angular and React.js to build scalable and responsive web applications. Comfortable with JavaScript, TypeScript, HTML5, CSS3, and integrating RESTful APIs. Adept at DOM manipulation and responsive design to create seamless user interfaces. Strong focus on delivering optimal user experiences, with proficiency in JWT authentication, state management, and Agile methodologies.

WORK EXPERIENCE

Capgemini, Pune

May 2022 – March 2024

Software Engineer

- Developed and maintained web applications using Angular and React.js, focusing on DOM manipulation, dynamic data rendering, and performance optimization.
- Integrated RESTful APIs with frontend frameworks, ensuring secure communication and data flow using JWT authentication.
- Implemented responsive UI components using Bootstrap, and Tailwind CSS.
- Leveraged strong understanding of Angular concepts such as components, services, directives, routing, guards, interceptors, and reactive forms to create robust applications.
- Built and maintained Reactive Forms and managed complex state using Redux and NgRx.
- Optimized routing and navigation through Angular routing and React's React Router for improved user experiences.
- Worked in Agile environments, regularly collaborating with cross-functional teams to meet project goals and deadlines.
- Utilized Git for version control, enabling smooth collaboration and clean code management.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks/Libraries:** Angular, React.js, Bootstrap, Tailwind CSS
- **Web Technologies:** Responsive Design, DOM Manipulation, RESTful APIs
- **APIs & Authentication:** JWT, Axios, Fetch API
- **Version Control:** Git, GitHub
- **State Management:** Redux, NgRx
- **Tools:** NPM, Webpack, Vite
- **Agile Tools:** Jira

PROJECTS

- **CrickDex:** CrickDex - A player identifier app built using React.js and Tailwind CSS. Users upload a photo to receive cricketer details from an AI-based API.
- **QuestionX:** QuestionX - A chatbot application developed using JavaScript and Bootstrap, providing real-time answers based on user input.
